Introduction

The name of this report is actually a bit of a misnomer as there are actually 118 plugins listed. The graphics were prepared earlier, when I figured 100 would be the number to stop at, but there are just so many fantastic plugins available for WordPress that for the sake of completeness, I reckoned I had to mention some additional plugins.

Anyway, this is now a pretty complete list of highly recommended plugins covering various aspects of blog building.

If you're not familiar with the latest version of WordPress, there's a set of 30 videos here that will teach you everything you need to know about building blogs with WordPress (Master Resale Rights are included):

[WordPress Mastery Video Tutorials](#)

Enjoy.

Gary Nugent

Ecommerce

1. [Eshop](#)

eShop is an accessible shopping cart plugin for WordPress. It is packed with various features, including basic statistics, sales data, various payment options, various methods to list products, basic stock control and various discount options. Most importantly, it can be linked with multiple merchant gateways including Authorize.net, Paypal, Payson, eProcessingNetwork, Webtopay, iDEAL and Cash/Cheque!

2. [Shopp](#)

Shopp is an e-commerce plugin that adds a feature-rich online store to your WordPress-powered website or blog. Get your store up and running in minutes. Then, take it to the next level with the flexibility of Shopp's customization tools that allow production studios and power users to tailor every aspect of the shopping experience.

3. [PayPal Payment Terminal Wordpress](#)

With its super easy installation, PayPal Payment Terminal Wordpress allows you to start accepting paypal payments on your wordpressite. You can display it as a widget or on any page/post, view and sort all transactions and send out automatic notifications to your customers and yourself.

4. [uPricing - Pricing Table for Wordpress](#)

uPricing is a pricing table for WordPress. It is a standalone plugin that allows you to create a pricing table to list your products in. Perfect for comparing products across their features and price.

5. [GetShopped](#)

The WP e-Commerce Plugin is offered under GetShopped and is a shop owner's dream. It offers a fully integrated shopping cart application suitable for selling your digital and tangible products, services, and or fees online. It can be integrated with Google Checkout, DPS / Paystation, Paypal and offers an audio player module for selling mp3 files and digital downloads. Its functionality can be extended by using add-on plugins.

6. [Cart66](#)

Cart66 allows you to sell digital and physical products, collect recurring payments for subscriptions, memberships, and payment plans. You can even build a complete membership site with plugin and set up coupon codes for promotions.

7. [Wordpress Dealpon](#)

WP Dealpon is a completely automated, turn-key wordpress plugin that will let you run automatically controlled special offers right from your wordpress blog. You can run special offers for your products, resurrect older offers with a new, special discount and improve your promotional campaign for your products.

8. [Quick Shop](#)

Quick Shop supports any WordPress that has the sidebar widgets installed. It adds a SideBar widget that shows the user what they currently have in the cart and allows them to remove the items, not to mention a TinyMCE button to easily allow you to add products to your posts/pages.

Contact/Email Plugin

9. [Contact Form 7](#)

Contact Form 7 can manage multiple contact forms, plus you can customize the form and the mail contents flexibly with simple mark up. The form supports Ajax-powered submitting, CAPTCHA, Akismet spam filtering and so on.

10. [Fast Secure Contact Form](#)

This plugin allows you to easily create and add contact forms on your WordPress site. The contact form will let the user send emails to a site's admin. An administration panel is present, where the webmaster can create and preview unlimited forms.

11. [Scaleable Contact Form](#)

This is a contact form plugin which creates a very customizable contact form on your Wordpress blog. It uses Captcha to prevent spam submissions and you can configure required, non-required fields.

12. [Gravity Forms](#)

Gravity Forms lets you build and publish your WordPress forms in just minutes. No drudgery, just quick and easy form-building. Select your fields, configure your options and easily embed forms on your WordPress powered site using the built-in tools.

General

13. [W3 Total Cache](#)

W3 Total Cache improves the user experience of your site by improving your server performance, caching every aspect of your site, reducing the download times and providing transparent content delivery network (CDN) integration. By using this plugin you will speed up your WordPress blog significantly.

14. [Google Web Fonts for WordPress](#)

Google Fonts Pro is a premium WordPress plugin that allows you to instantly access over 200 of Google's Web Fonts with power and ease. You can take full control over the font and typography used on your site in a matter of minutes!

15. [Exclude Pages](#)

This plugin comes in handy when you want to create pages that you don't want the general visitors on your site to view. This means that you can specify pages which will only be accessible through their direct URL and not visible on the main page.

16. [Easy Privacy Policy](#)

Google requires a Privacy Policy on any site displaying Google AdSense ads. In a lot of Affiliate Programs Terms of Service, they same thing applies. By having a Privacy Policy on your site, you take care of this requirement. There is an easy way. Just use the Easy Privacy Policy plugin.

17. [Email Users](#)

A plugin for wordpress which allows you to send an email to the registered blog users. Users can send personal emails to each other. Power users can email groups of users and even notify group of users of posts.

18. [Subscribe 2](#)

Subscribe2 provides a comprehensive subscription management and email notification system for WordPress blogs that sends email notifications to a list of subscribers when you publish new content to your blog. Email Notifications can be sent on a per-post basis or periodically in a Digest email.

19. [WP Simplicity](#)

WP Simplicity is an amazing blogging tool, which allows you to leverage your time and your income. It is developed with the most advanced features to offer time-saving solutions and transform blogging experience. It eliminates the headache of creating and managing Wordpress sites.

20. [Pingback Optimizer](#)

Optimize Your Pingbacks! - Automatically submit your pingback URLs to multiple RSS directories. Boost your search engine rankings and get more traffic!

21. [WordPress Auto-Translator Plugin](#)

This is a Wordpress auto translation plugin that uses IP address technology. Once installed, the plugin can translate all Wordpress pages including widgets. It is a Google Translator API based and supports 50 languages which include Italian, Korean, Chinese, Portuguese, German, French, Spanish, Japanese, Hebrew, Indonesian and many more.

Interactive

22. [WP-Polls](#)

WP-Polls is a Poll plugin that is extremely customizable using its in-built templates and css styles. There are tons of options for you to choose to ensure that the polls run the way you want. It encourages interaction on your site as well as allows you to collect feedback from your Wordpress site visitors.

23. [Subscribe to Comments](#)

Subscribe to Comments is a robust plugin that enables commentators to sign up for e-mail notification of subsequent comments left for the post. The plugin includes a full-featured subscription manager that your commentators can use to unsubscribe to certain posts, block all notifications, or even change their notification e-mail address!

24. [Get Recent Comments](#)

This plugin displays excerpts of the most recent comments and/or trackbacks that have been posted to the articles in your blog, in your sidebar. You can let the plugin order the comments by the corresponding post, or simply order them by date. The plugin can (optionally) separate the trackbacks/pingbacks from the comments.

25. [GD Star Rating](#)

GD Star Rating plugin allows you to set up rating and review system for posts, pages and comments in your blog. You can set many options for displaying the rating stars, and add widgets into the sidebars for displaying top ratings and other statistics generated by the plugin. The plugin supports multiple languages such as English, Serbian, Spanish, Hindi, German, Italian, French, Ukrainian, Belorussian, Russian, Polish.

26. [CommentLuv](#)

CommentLuv for WordPress plugin fetches the feed found at commentators' site URL while they type their comment and extracts their last blog post title with link and displays it below the comment form. When they submit their comment, the last blog post link gets added at the end of their comment for all to see! This gives your web visitors more reason to leave a comment on your site.

27. [LinkWithin](#)

LinkWithin is a blog widget that shows related stories from your blog archive under each post and links to them. This makes your older posts accessible to new or casual readers of your blog who otherwise would not encounter them. Moreover, as the widget only links to posts that are relevant to the readers of a particular post, it keeps them engaged with your blog for a longer period of time.

LinkWithin

28. [Popularity Contest](#)

Popularity Contest keeps a count of your post, category and archive views, comments, trackbacks, etc. and uses them to determine which of your posts are most popular. There are numerical values assigned to each type of view and feedback; these are used to create a 'popularity score' for each post.

29. [WP Flip Page](#)

WP Flip Page provides a simple and effortless way to take any PDF document, ebook, or set of image files and turn them into stunning, interactive 3D flipping books with page-flipping animations that can be embedded directly into your blog! Increase the "stickiness" of your blog by creating valuable, useful, interactive content such as digital books, reports, magazines, picture portfolios and catalogues that behave like real life paper books without any advanced programming work!

30. [WP-Email](#)

This WordPress plugin allows people to recommend or send your blog posts pages to friends via Email. This helps you get more visitors.

31. [Comment Redirect](#)

Redirect commenters who just made their first comment to a page of your choice. On this page, you could thank them for commenting and ask them to subscribe to your blog, like you on Facebook, whatever you want!

32. [Thank Me Later](#)

Thank Me Later plugin will automatically send an e-mail to those who leave a comment at your blog. Use this plugin to say 'Thanks' to your visitors, and prompt them to further engage with your blog.

Security

33. [Akismet](#)

Akismet checks your comments against the Akismet web service and filters out your comment and track-back spam for you, so you can focus on more important things.

34. [Secure WordPress](#)

Secure WordPress beefs up the security of your WordPress installation by removing error information on login pages, adds index.html to plugin directories, hides the WordPress version and much more. It also blocks any bad queries that could be harmful to your WordPress website.

35. [WP-SpamFree Anti Spam](#)

This is a powerful anti-spam plugin for WordPress that eliminates comment spam, including trackback and pingback spam. It works invisibly without CAPTCHA's, or causing any form of inconvenience to your site visitors. The plugin includes spam-free contact form feature as well.

36. [WP Security Scan](#)

WP Security Scan checks your WordPress website/blog for security vulnerabilities and suggests corrective actions to ensure your passwords, file permissions and database are secure. It ensures your WordPress admin is secure as well.

37. [BulletProof Security](#)

The plugin is designed to be a fast, simple and one click security plugin that creates, copies, renames, moves or writes to the provided BulletProof Security .htaccess master files. It protects both your Root website folder and wp-admin folder with .htaccess website security protection, as well as providing additional website security protection.

38. [Limit Login Attempts](#)

The plugin limits the number of login attempts possible both through normal login as well as using auth cookies. It blocks an Internet address from making further attempts after a specified limit on retries is reached, making a brute-force attack difficult or impossible. It has been translated to multiple languages such as Bulgarian, Brazilian Portuguese, Catalan, Chinese (Traditional), Czech, Dutch, Finnish, French, German, Hungarian, Norwegian, Persian, Romanian, Russian, Spanish, Swedish, Turkish.

Listbuilding

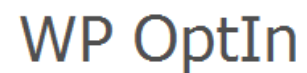

39. [WP Slide In](#)

The WP Slide In Wordpress plugin allows you to create eye-catching opt in banners that stick to the base of your blog and virtually attract your blog visitors to subscribe to your mailing list! You can load up as many Slide Ins as you want and you can customize where they enter from.

40. [WP Opt-in](#)

WP OptIn is a Wordpress plugin that allows your commenters to subscribe to your email newsletter or autoresponder simply by checking a box automatically placed in your comment forms. The plugin integrates with Aweber, ConstantContact, or MailChimp to subscribe commenters without an extra subscription step.

41. [WP Squeeze Page Plugin](#)

The Wordpress Squeeze Page Plugin allows you to grow your subscriber opt-in/mailling list by helping you design and build beautiful, highly converting squeeze pages easily through the Wordpress dashboard.

42. [Social Squeezer](#)

This list building Wordpress plugin lets you tap into the power of Facebook to help you build your list quickly. What it does is it builds your list with your web visitors' Facebook details which include their names and primary email addresses. All these data is retrieved automatically when they've permitted your Facebook application, making it a non-intrusive way of generating leads from your marketing campaigns.

43. [PopUp Domination](#)

PopUp Domination is an easy-to-use list building Wordpress plugin that helps you create a popup window on your website to help you capture email leads. The great thing about PopUp Domination is that it is designed to popup within a light box which does not risk getting blocked by popup blockers installed on the web browsers, making it a breeze to display your email capture offer to your web visitor above all your website content.

44. [List Eruption](#)

List Eruption is a Wordpress plugin which you can install in your website and it will then help to grow your subscriber's list. It basically helps you build an incentive-based referral system so that your subscribers are rewarded for referring friends. The more friends they refer, the more incentives they get. It acts as a referral management system where you reward each of your subscribers for growing your list for you. List Eruption will automatically deliver reward content once they reach each of the reward levels that you set.

45. [WPSubscribers Plugin](#)

WPSubscribers Plugin allows you to create and customize unlimited number of web forms which include popup forms, footer bar forms, custom forms, exit popups. It works with any autoresponder service provider such as AWeber, GetResponse and Mailchimp. You can customize the position and place your web form anywhere on your site.

46. [Subscribers Magnet](#)

This plugin lets you easily add the opt-in form anywhere in your Wordpress blog, including the sidebar, footer, within the post itself and even in the comments. Expose your web visitor to your offer/ mailing list form multiple times in a friendly, non intrusive manner. It automatically fill the visitors' name/email in the opt-in form on your blog, saving them time and getting you more sign-ups! It is compatible with AWeber, GetResponse, and all the other major autoresponders.

Search Engine Optimization

47. [All In One SEO Pack](#)

The plugin is a powerful plugin that automatically optimizes your WordPress blog for search engines. It supports custom post types, fine tunes page navigational links, generates meta tags automatically and is the only plugin to provide SEO integration for wp e-commerce sites. It automatically optimizes your titles for search engines and you can override any title and set any meta description and any meta keywords you want.

48. [SEOPressor](#)

This Wordpress SEO is an SEO plugin and tool that will take care of optimizing on-page factors and give your websites the advantage to rank high in the search engines. It helps you analyse title, H1,H2 and H3 tages, keyword density and content length, exact placement of your keyword and so much more. SEOPressor comes highly recommended by SEO experts as it intelligently optimizes your website to rank high on the search engines.

49. [Google XML Sitemaps](#)

This plugin will generate a special XML sitemap which will help search engines like Google, Bing, Yahoo and Ask.com to better index your blog. With such a sitemap, it's much easier for the crawlers to see the complete structure of your site and retrieve it more efficiently. The plugin supports all kinds of WordPress generated pages as well as custom URLs. Additionally it notifies all major search engines every time you create a post about the new content.

50. [Platinum SEO Pack](#)

Platinum SEO Plugin is the ultimate wordpress SEO solution. You can add index, noindex, follow or nofollow, noodp, noydirmeta tags to any post or page. This plugin automates SEO for your Wordpress blogs.

51. [Yoast WordPress SEO](#)

Yoast WordPress SEO is the most comprehensive SEO plugin available for WordPress. The plugin is far superior to the Platinum SEO Pack as it incorporates most of the features of that plugin and other plugins, and does a better job. It also incorporates RSS Feed, Breadcrumb Management (advanced usage), and it replaces the Google XML Sitemap plugin by managing XML Sitemaps right from the plugin.

52. [WP-DBManager](#)

WP-DBManager Allows you to optimize your database, repair the database, backup the database, restore the database, delete backup databases, drop/empty tables and run selected queries. Supports automatic scheduling of backing up, optimizing and repairing of the database on your blog.

53. [MaxBlogPress Ping Optimizer](#)

MaxBlogPress Ping Optimizer plugin corrects WordPress's ping system and after you install it, your blog will ping and notify all the ping services when it has been updated. This encourages search engines and different blog directories/services to index your updated blog properly.

54. [SEO Title Tag](#)

SEO Title Tag makes is dead-easy to optimize the title tags across your WordPress-powered blog or website. Not just your posts, not just your home page, but any and every title tag on your site!

55. [Web Traffic Genius](#)

Every time you publish a post on your blog, an RSS feed containing the post (or excerpt) is created and submitted to multiple RSS aggregators, getting you free backlinks. You can also specify extra items for the RSS feeds so you can have earlier select posts from your blog appear in the RSS feeds, or you can add items for other pages and websites instead. Or use a mix. The beauty is that each time a post is published, you'll get backlinks to all the items in the created RSS feeds. Now apply that across all your blogs and you'll see that this is a very effective way of building a large number of backlinks, all on autopilot. I have a review of the plugin here: <http://www.webtrafficgeniussoftware.org>

56. [Keyword Winner](#)

Keyword Winner is a Wordpress Keyword and SEO plugin that will help you analyze your competition, search trends and back links. It researches keywords for your blog posts easily, suggesting targeting headlines with low competition and helps give your websites the advantage to rank high in the search engines. It also has a page competition rank checker.

57. [SEO Smart Links Premium](#)

SEO Smart Links Premium improves the overall SEO strength of your blog by automatic interlinking your content as well as automatically convert keywords you define into (affiliate) links. In a recent comparison, SEO Smart Links Premium has been selected as the best keyword affiliate link plugin.

58. [SEO SearchTerms Tagging 2](#)

This is the plugin you need to multiply your blog traffic in algorithmic scale by strengthening on page SEO, increasing the number of indexed pages, auto convert search terms into post tags, and more.

59. [Automatic Backlink Creator Plugin](#)

TOP 100 Wordpress PLUGINS

MUST HAVE PLUGINS TO
TRANSFORM YOUR
WORDPRESS SITE!

The Automatic Backlink Creator plugin helps you create backlinks to your blog effortlessly. The plugin gets your articles with anchor text links displayed in the ABC network. Collectively, the members of the network will then be helping each other create backlinks for each other automatically. In addition, your site gets indexed and pinged daily.

Video Player

60. [Smart YouTube](#)

Smart Youtube is a WordPress Youtube plugin that allows you to easily insert Youtube videos/playlists into your post, comments and in your RSS feed. The plugin is designed to be small and fast and not use any external resources. The videos will be embedded in your RSS feed as well.

61. [TubePress](#)

TubePress displays gorgeous YouTube and Vimeo galleries in your posts, pages, and/or sidebar. It is compatible with most themes and gives you the ability to create galleries from multiple video sources.

62. [The Traffic Player](#)

The Traffic Player is a Wordpress plugin and powerful video player that lets you create video pages on your Wordpress sites. It allows you to decorate your Youtube or Flash videos with awesome video skins and turn your videos into stunning presentations.

63. [Video Gallery Wordpress Plugin](#)

This plugin is an advanced stock video gallery which fits perfectly into your site design. You can easily configure and customize your video gallery with videos. You can set up a gallery just by entering in your YouTube user/playlist in the 'feed' tag of the xml file.

Membership

64. [Digital Access Pass](#)

Digital Access Pass creates a membership site out of your Wordpress blog. You can effortlessly create and protect new content on your membership site and launch an affiliate program from within. You can configure the settings of the DAP plugin to suit your needs. It allows you to drip new content on your members day after day, month after month.

65. [Buddy Press](#)

BuddyPress lets you build a social network for your company, school, sports team or niche community all based on the power and flexibility of WordPress. It lets users register on your site and start creating profiles, posting messages, making connections, creating and interacting in groups and much more.

66. [Wishlist Member](#)

WishList Member is a powerful, yet easy to use membership solution that can turn any WordPress blog into a full-blown membership site. You can easily create a protected, members-only content area, integrated payments and member management.

67. [Magic Members](#)

Magic Members is a premium Wordpress membership plugin which has a lot of powerful features which include unlimited membership levels, flexible membership options, unlimited coupon creation, entire blog protection, member management and download management. There is payment integrations which allows your members to pay with PayPal Standard, 2Checkout, CCBill, Authorize.net, ClickBank, WorldPay, MoneyBookers, AlertPay and many others.

68. [Membership Plugin](#)

Membership transforms your WordPress website into a fully functional membership site. Provide access to downloads, online content, videos, forums, support and more through flexible membership levels and options. This plugin will meet all of your membership site needs.

69. [Member Wing](#)

The MemberWing-X plugin allows you to build any kind of membership site. The plugin also allows you to create an online store selling access to digital downloadable materials such as e-books or podcasts. You can integrate your website easily with autoresponders, such as Aweber and Mailchimp and build your mailing list automatically. You can also restrict access to various access posts, pages and digital downloadable materials.

RSS Feed/ Content Generating

70. [WP Robot](#)

WP Robot is a powerful and easy to use autoblogging plugin for Wordpress weblogs allowing you to turn your blog on complete auto-pilot and drip-feed it with fresh content in regular intervals you specify. The posts created will be targeted to any keyword you enter and any topic you could ever think of!

WP ROBOT³

71. [Digi Traffic Multiplier](#)

Digi Traffic Multiplier lets you update multiple blogs daily with completely relevant, search engine optimised content. It does all the work for you by working out the keywords that your traffic are using and generating content directly relevant to them.

72. [Related RSS Plugin](#)

Related RSS Plugin is a Wordpress plugin and it promises to help you automatically create unique and most importantly relevant RSS feed for every page of your Wordpress site. The best thing is the RSS feed will be relevant to the page it is placed on, so it will certainly help your Google rankings!

**Related RSS
PLUGIN**

73. [WPeMatico](#)

WPeMatico is for autoblogging, automatically creating posts from the RSS/Atom feeds you choose, which are organized into campaigns.

74. [Autoblogged](#)

AutoBlogged™ automatically creates fresh targeted content for your blog by importing articles from RSS feeds or search keywords. You can use AutoBlogged™ to supplement your own content or build a fully automated blog for keyword targeting, affiliate marketing, aggregating content, or as an alternative to domain parking.

75. [WP Turbo](#)

WPTurbo is a new premium auto blogging plugin for WordPress that allows you to create powerful niche sites which create content, update themselves automatically. The plugin has a powerful system to allow you to create your own templates and target by keyword and add filters so your sites are unique to you.

76. [CommentPiG](#)

CommentPiG is a WordPress plugin that gets more comments for your blog. It analyses your post's topic and scours the internet to find suitable comments. Targeted comments are automatically added to your posts which in turn encourages your real readers to start adding more comments. CommentPiG automatically handles the scheduling, posting, targeting, linking & filtering of all your blog comments. Novice bloggers can use CommentPiG out-of-the-box whilst experts can leverage the advanced features to exploit its full potential.

77. [WP Importer](#)

WP Importer sucks content out of almost every data base or spread sheet you can possibly access and merges your data into blog posts that you can publish quickly and in unlimited numbers. With WP Importer the number of your posts is only limited by the size of the data bases you can gain access to. And these databases you can recycle over and over again to produce ever more content.

There are also a number of other very useful plugins available from the above link.

78. [Unique Article Wizard](#)

[Unique Article Wizard](#) is a service which publishes submitted articles to hundreds of article directories and blogs. In order to disseminate the content from their members further, they've created a free plugin for WordPress that will add articles to your blogs on autopilot. The advantage is that you get fresh content on a regular basis. The disadvantage is that the articles will contain affiliate links that belong to the article's author. That's the price for getting the content.

Content is of high quality as Unique Article Wizards review all article submissions before accepting them. The names you select for your blog categories are important as they are what is used to find matching content. You can control how many article get published , and when and articles can bet set to get published automatically or be put into Pending status so you can review them prior to publication.

Additional filters allow you to receive content only for specific categories and to exclude content containing specified keywords.

A great plugin for adding quality content you your blogs.

Monetization

79. [MaxBlogPress Ninja Affiliate](#)

Ninja Affiliate is WordPress plugin developed to instantly double or triple your affiliate marketing commissions with almost no effort on your part. Using Ninja Affiliate, you can automatically convert any keyword in your blog to an affiliate link instantly. You can also cloak your affiliate links, track them and manage them right from your WordPress text editor.

80. [CloakPiG](#)

CloakPiG isn't just another link cloaker plugin. It will cloak all your links (even pre-existing external links on your blog) and preload your affiliate cookies, auto-link your keywords and preserve your pagerank. Tracking is built in so you can see what links are being clicked. Links – both auto-generated and those you manually create – are easily managed from the plugin's admin panel.

81. [phpBay Pro](#)

phpBay Pro is the best plugin for adding eBay auction listings to your blog. Item listings can be presented in list or multi-column format. You can set how many items to display and how many items to retrieve from eBay based on keywords. Pagination links are automatically added when fewer items than are retrieved are displayed on a page. 18 filters give you complete control over what items are displayed. Integration into a WordPress blog is simple but you must be a member of the eBay Partner Network if you want to earn commissions from eBay.

82. [EasyAZON](#)

Easy Azon WordPress Plugin allows you start profiting from the Amazon and helps you to quickly and easily add affiliate links to your blog without ever leaving your WordPress dashboard. You can search for amazon products from within your wordpress blog by keyword and decide which affiliate link you want to create (text, image, or product info block).

83. [ReviewAZON](#)

Probably the best-known Amazon plugin for WordPress, ReviewAZON makes adding product listings to your blogs simple. You can add a single inline product to a post (a bit like an image ad), add multiple inline products or add a complete post built around a single Amazon product. This will feature a product image, price, shipping details, product description, some additional images where available and review comments from customers who've bought the product. In addition, video reviews from YouTube can be added if you want. The plugin also features integration with [phpBay](#) and phpOStock so listings from these other revenue sources can appear at the bottom of a ReviewAZON post. The plugin can also do bulk posting of products which can be scheduled for posting on future dates - a great way of queuing up content for your blog. The plugin also includes a couple of widgets that can be added to the sidebar to show similar products or product accessories. All links can be cloaked if required.

84. [WPZonBuilder](#)

Another top-class plugin for adding Amazon listings to your blog. Very similar to ReviewAZON but does some things differently. You need to do a search for products and add them to a queue before you can post a product to your blog. The plugin uses jQuery to

add interactive images to a post, a feature that ReviewAZON lacks. The plugin also cannot integrate directly with [phpBay](#) and phpOStock as ReviewAZON can but you can add shortcodes for other plugins so that content appears before and/or after the Amazon product post. There's no feature to add video reviews to a post. Links cannot be cloaked by the plugin so it's recommended that you use a link cloaking plugin with WPZonBuilder. Posts, however, have a slight edge in presentation over those created by ReviewAZON. The plugin also comes with sidebar widgets similar to those of ReviewAZON.

85. [phpZon](#)

WP SHOPPING PAGES

This takes the same approach as [phpBay Pro](#) in displaying products from Amazon. Instead of a single product-per-page approach, you can list several products at once in a post in list or column format. There's a large number of options that allow you to filter products so that you only display exactly what you want (e.g. by min/max price, by keyword, in specific category, etc). A great plugin for adding product listings to regular posts.

86. [WP Shopping Pages](#)

WP Shopping Pages is a new and powerful affiliate plugin that creates content-rich Shopping Pages filled with Amazon, Linkshare and Commission Junction products as well as eBay auctions. It supports different popular affiliate programs, whose catalogs feature tens of thousands of different products you could display on your weblogs and all of which will earn you commission for doing so.

87. [Easy AdSense Pro](#)

Easy AdSense manages all aspects of Google AdSense for your blog. You can automatically insert ads into posts and sidebar, and add a Google Search box. It enforces the Google policy of not more than three ad blocks per page and displays ad blocks based on your post length.

88. [Amazon Simple Admin](#)

AmazonSimpleAdmin lets you easily integrate Amazon products into your wordpress pages. By using the template feature, you can present the products in different styles on different pages.

89. [Quick Adsense](#)

Quick Adsense is an Ads management WordPress plugin. It offers a quicker & flexible way to insert Adsense or any Ads code into a blog post. Besides, it can randomly place the Ads anywhere within a post. It comes with a simple setting page, and it does not overwhelm you with complicated customizable options.

90. [Ad Injection](#)

With Ad Injection you can literally place ads anywhere you want on your site, regardless of the type of advertisement it is. There are tons of options on how to set where ads will appear on your posts and pages. Up to 10 ads can be rotated in each of the major ad positions (top of post, middle of post, bottom of post and post footer). Very Powerful with A/B Testing, Rotations, etc.

91. [OIO Publisher](#)

OIO Publisher is an ad manager that enables you to maximise your revenue, save time, and keep you in complete control of your ad space.

Sell and serve ads on your blog. Put the ads wherever you want. You can sell text ads, banner ads and guest posts. You have complete control over your advertising, with fully automated sales. You keep 100% of your revenue and you can run 3rd party ad networks alongside your own ads.

Save \$10 with this coupon code: **MIST-WEBBIZKB**

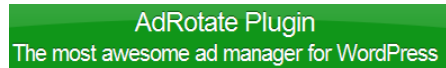

92. [WP Comment Cash](#)

WP CommentCash is a completely automated, turn-key wordpress plugin that generates automatic clickbank affiliate links from spammers and spambots to drive extra affiliate sales to your clickbank account. It turns any spam links into your Clickbank affiliate links automatically.

93. [AdRotate](#)

This is an ad manager plugin which allows you to add The plugin supports unlimited groups for banners and you can customize the position of the banners in different areas of the website.

94. [Backlinks Genius](#)

What Backlinks Genius does is hyperlink words and phrases in your content. You get paid whenever a link is placed on a page, whether the link is clicked or not. You only get about \$0.01 per link placement but the more pages you have (and the more blogs) means more links, and those \$0.01 payments can really start to add up.

95. [Text Link Ads](#)

The Text Link Ads system sells ad space on your blogs for text links for advertisers. You have the option of accepting or rejecting ads for display or can opt to have them be accepted automatically. Any site you submit to Text Link Ads for inclusion in their network are likely to be rejected if they have a PageRank of less than 3 and don't get decent traffic but PR2 sites do sometimes get accepted. Payouts depend on the PR of the site and range from

about \$5 up to over \$100 per ad/link. Since you can have up to 8 links on a site, that could add up to a nice monthly income if you have a few blogs.

96. [Kontera](#)

Kontera hyperlinks words and phrases in your content. When a visitor moves their mouse over a link, an ad pops up. You get paid per click. Links are double-underlined to distinguish them from regular links on your pages. You do need to sign up with Kontera before you can use their plugin.

97. [Infolinks](#)

Very similar to Kontera and a good alternative. However, don't use both Kontera and Infolinks on the same website. Kontera impose an exclusivity agreement with webmasters. Like Kontera, Infolinks pays per click. Their payouts are higher but the clicks seem to be fewer. Links are double-underlined to distinguish them from regular links on your pages. You do need to sign up with Kontera before you can use their plugin.

Social Sharing
